DETAILED ACTION

Claim Objections

1. Claim 8 is objected to because of the following informalities: in line 5, "Third Section" should not be capitalized. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 5, "at least two walls" is a double inclusion insofar as the walls are being reintroduced into the claim.

In claim 1, lines 5 and 6, "the top and bottom half" lacks antecedent basis in the claim.

In claim 5, line 6, "the side wall" is unclear with respect to which of the previously defined plurality of side walls is being referred to.

In claim 6, line 5, "a bowl" is a double inclusion of an element.

In claim 7, lines 3 and 4, "at least one side wall" is a double inclusion of an element.

In claim 8, lines 8 and 9, "the upper wall panel and lower wall panel" is unclear with respect to which of the previously defined plurality of upper wall panels and lower wall panels is being referred to.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3727

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Blatt in view of Johnson et al. Blatt discloses all structure of the claimed container assembly except a sealed container within the outer container. Johnson et al discloses that it is known to package smaller sealed containers within an outer sealed container. It would have been obvious to use the shipping container of Blatt to ship sealed smaller containers as taught by Johnson et al as a mere selection of what one wishes to put in a container. The concept of packaging smaller containers in a larger container is notoriously well known in this art.

Allowable Subject Matter

5. Claims 1-4 and 6-8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The remaining cited prior art is illustrative of the general state of the art.
